

Group Geologist Mining Operations (517002)

Location: Subiaco, Western Australia.

Are you a highly motivated, creative geologist craving the wingspan and autonomy to achieve geological excellence in a company?

Following an internal re-structure due to growth opportunities, we are looking for an operationally experienced geologist who has a drive for transformation and ambition to achieve, to join the newly formed operational support technical team and share the wealth of technical expertise you have accumulated.

About Perseus

We are a West-African gold explorer, developer and gold producer. Perseus Mining Limited is listed on both the ASX and TSX. The Perseus Group operates the Edikan Gold Mine in Ghana, the Sissingué Gold Mine and Yaouré Gold Mine in Côte d'Ivoire. The successful applicant will be required to visit and work at the Company's operating and development sites. Perseus values and develops its people and offers dynamic career opportunities for aspiring candidates in the gold mining industry.

The Role

Reporting to the Group General Manager and working within Technical Services team, you will have full responsibility for providing technical support to the site-based geological teams and own the Mineral Resource. You will be expected to implement leading practices and systems across the company and have a fundamental impact on people, growth and enhancement.

Key responsibilities of the role include but are not limited to:

- Grow the business.... You will have a high level of autonomy and support to focus on the key aspects at each operation to ensure we support the operational teams and maximise the resource and deliver our operational targets;
- Minimise or mitigate company risk and exposure in the area of geology and enhance the company's assets;
- Lead the development and implementation of standard geological processes across the company in the areas of geology and resource estimation and own the company's Mineral Resource;
- Produce, oversee and/or sign-off on the Company's Mineral Resource (JORC and NI 43-101) additions associated with Mining Operations;
- Work collegiately with site personnel to engender trust, upskilling of staff to enhance site based expertise;
- Continually assess and challenge "*group-think*" to develop opportunities both organic and inorganic;
- Assist in the development of the Business Growth strategy.

Skills/ Experience:

- Tertiary qualification in Geology (or similar);
- Ability to sign-off on JORC Mineral Resources;
- Site based experience in leading and managing teams in geologically challenging open pits;
- In-depth knowledge of mine geology, reconciliation, QAQC and resource estimation;
- Good interpersonal skills, strong leadership and the character to mentor team members;
- High level of proficiency in at least one mining software package;
- A strong commitment to health, safety, environment and community.

We are seeking a solid leader who wants to work as team member to enhance the position of our mines' performance and company. You will be entrusted with a broad scope and autonomy to work within the bounds of achieving what is necessary.

How to apply

If you want to work unstifled, in a values driven organisation then please submit your resume and covering letter to jobs@perseusmining.com before 5pm on **5th May 2021** (AWST). Please quote **"517002 – Group Geologist Mining Operations"** in the subject of your email.

Perseus Mining is an equal opportunity employer who supports and builds a diverse workforce. We value our people and help them build up their skills and take their careers to the next level.

Applicants must have the right to work in Australia.

NO AGENCY REFERRALS WILL BE RECEIVED AT THIS TIME
